

Energy Emergency Alert:

CodeRED Message:

This is an urgent message from Breckenridge Public Utilities. The City is currently experiencing a power failure due to increased regional demand for electricity. It is not clear how long the outage will last. Water restrictions have been activated to prevent sewer backups city wide. Please refrain from excessive use of water and toilet flushing. The City water remains safe to drink but overuse of the system will cause sewers to backup. Refer to the City of Breckenridge Facebook page and KBMW AM Radio for further updates. Further information will be sent via CodeRED as needed.
